KINY ST CHARLES

Email: kennycharles.dev@gmail.com
GitHub: github.com/kennycharlesdev | Portfolio: kennycharlesdev.github.io/my-portfolio

PROFILE

Software developer focused on web development, AI automation, and practical digital solutions. Building hands-on projects in frontend, backend, and workflow automation while developing toward entry-level software, technical support, and SaaS support opportunities.

SKILLS

Frontend: HTML5, CSS3, JavaScript, Responsive Design
Developer Tools: Git, GitHub, VS Code
Backend & Automation: Node.js, Express, APIs, Workflow Automation
Systems & Learning: Linux, Command Line, Networking Basics, Cybersecurity Fundamentals, Cloud Fundamentals
CompTIA Security+: In Preparation

RELEVANT EXPERIENCE

Aquatics supervision and operations support, including safety protocols, customer service, scheduling, and team coordination.
Hospitality experience focused on customer service, communication, teamwork, and handling fast-paced service environments.
Construction support experience involving task coordination, attention to detail, safety awareness, and efficient workflow support.

PROJECTS

Developer Portfolio — Personal website built with HTML, CSS, and JavaScript. Live project hosted on GitHub Pages.
LeadFlow OS — Concept project for CRM and workflow automation with lead tracking and follow-up processes.
Website Factory — Concept project focused on website creation and business site management workflows.
NextStream — Learning project exploring streaming app architecture, UI flow, and backend concepts.

PROFESSIONAL DEVELOPMENT

Self-directed learning in software development, AI-driven productivity workflows, and practical automation. Current focus includes entry-level software engineering, technical support workflows, SaaS support fundamentals, and secure, maintainable web applications.
